=== SITE OVERVIEW ===

Project Name: Taskflow project management saas platform – Multi-tenant Kanban & Workspace Platform
URL: https://taskflowapp.app
Core Purpose: A modern, real-time Kanban board app where users create unlimited boards inside personal or team workspaces. Built for individuals, startups, and enterprises.

=== KEY FEATURES ===

• Multi-tenant workspaces (personal + team)
• Unlimited boards, lists, tasks per workspace
• Real-time collaboration (via Supabase Realtime)
• Drag-and-drop task movement
• Task priorities, due dates, assignees, descriptions
• Workspace-level permissions (owner, admin, member)
• Plan-based limits:
  - Free: 1 workspace, 2 boards
  - Premium: 5 workspaces, unlimited boards
  - Enterprise: Unlimited
• Beautiful UI with shadcn/ui + Tailwind CSS
• Next.js 14 App Router with dynamic /w/[slug] routing
• Secure Edge Functions for board/workspace creation
• Row Level Security (RLS) on all tables

=== PRICING & PLANS ===

- Free Tier:
  - 1 personal workspace
  - Max 2 boards
  - Basic features
- Premium ($20/month):
  - Up to 5 workspaces
  - unlimited boards per workspace
  - Priority support
- Enterprise (Custom):
  - Unlimited everything
  - SSO, audit logs, dedicated support

=== HOW IT WORKS ===

1. User signs up → auto-creates personal workspace via trigger
2. URL becomes /w/personal-abc123
3. User creates boards → /w/personal-abc123/board/xyz
4. Invite teammates → they join via email → appear in workspace_members
5. Switch workspace → URL changes → all data scoped instantly

=== TECH STACK ===

- Frontend: Next.js 14 (App Router), React, TypeScript, Tailwind, shadcn/ui
- Backend: Supabase (Postgres + Auth + Realtime + Edge Functions)
- Database: PostgreSQL with RLS
- Deployment: Vercel (frontend), Supabase (backend)
- State: React hooks + Context API

=== COMMON USER QUESTIONS ===

Q: "How do I create a new workspace?"
A: Click "+ New Workspace" in the sidebar → enter name & slug → created instantly.

Q: "Why can't I create more than 2 boards?"
A: You're on the Free plan (max 2 boards). Upgrade to Premium for 20.

Q: "Where is my personal workspace?"
A: After signup, you're redirected to /w/personal-[random]. It's always there.

Q: "Can I invite team members?"
A: Yes! Go to Workspace Settings → Invite → enter email → they get a magic link.

Q: "Is my data secure?"
A: Yes. All tables use Row Level Security (RLS). Only members see their workspace data.

Q: "Can I export my boards?"
A: Coming soon in v2. Currently: copy-paste or use API.

Q: "How do I change workspace name?"
A: Workspace Settings → Edit Name → Save.
